

# LEAK CONTROL & HAZMAT EQPT.

## SEALING BANDAGES

For sealing pipes from the outside. Offer high level of flexibility in most demanding applications and situations.

## SEALING TUBE

Sealing Tubes are used for fast sealing of pipe bends, T-joints and difficult-to-access pipe connections. Just tie it, inflate and it will seal.

## SEALING BAGS / PADS

Used on tanks, in pipes and containers of all shapes and sizes. Suitable for hazardous liquids, fuels, water, oils, etc. Strap the bag and inflate it with air. Sealing plates and acid bags offer additional protection.

Drainage Sealing Bags also available that allow venting and a controlled draining of liquid from the tank.

## VACUUM DRAINAGE BAG

Seals leaks without using straps. Useful for wide flat surfaces that can't be strapped. Vacuum is created by using air-pressure from an air source.

## SEALING LANCE SET

Used to seal holes at a distance with a remote placement and inflation lance. Wedges & Cones for punctured tanks / pipes.

## PIPE PLUG KIT

Oil-resistant plugs with electrostatic and spark resistant accessories. For sealing pipes of different sizes or round holes.
